This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

This volume consists of Three Parts.

Part First (page 9 to 223) is a complete Catalogue of all the Books in the possession of the St. Louis Mercantile Library Association. It is simply an Alphabetical arrangement of Authors—of Anonymous Works under the leading word of their title, and of Biographical Works, under the name of the Subject of the Memoir, as well as the Author.

Part Second (page 225 to 307) is a Classification of Subjects, in which all the Books in the Library are collected under the titles of the department of learning to which they severally belong. Here, they are again arranged alphabetically, under the same word of reference as in Part First.

Part Third (page 309) is an Alphabetical Index of subjects not enumerated in Part Second. The figures opposite each title denote the pages where books upon that subject can be found.

With respect to the arrangement of the Classification, it may be well to state, that it is the same, with little exception, as that which is used in the Catalogue of the Harvard University Library of 1830; and, as to a subject upon which the rules are so arbitrary and opinions so various, it is believed that this arrangement is as perfect as any heretofore published, and it is hoped that it will be as satisfactory to the mass of our readers as any which could be adopted.

The Compiler of this, the first Catalogue which has yet been published of the Books belonging to the Saint Louis Mercantile Library Association, believes that it is as complete and correct as the disadvantageous circumstances under which it was compiled would allow. A statement of these circumstances may be comprised in the fact, that at one and the same time the several duties of

Librarian, Collector of the Association, and Compiler, devolved upon one person, without any assistance but that of penmen. And when it is known that it is more vexatious and difficult to revise and correct the labors of others, than to perform the work one's self, correctly, he trusts that the errors which may be found will be passed over with indulgence.
